Title:

“Inkjet printing and digital fabrications”

Digital Fabrication with Inkjet Printing of Functional Fluids

Inkjet printing of functional fluids has opened up new process technologies and has become an important area within ‘digital fabrication’. This presentation explains the manufacturing processes for industrial piezo inkjet printheads, their operational principle, and covers industrial applications of inkjet printing that range from manufacturing processes of displays, electronics, coatings, solar cells, memories, biotech etc.

Termin: 16. Juni 2011 um 14:00 Uhr s.t. im Seminarraum
Veranstaltungsort: Laser-Laboratorium Göttingen e.V., Hans-Adolf-Krebs-Weg 1, 37077 Göttingen

Gastgeber: Jürgen Ihlemann
Laser-Laboratorium Göttingen e.V.
